

Contribution Summary

Alissa Canesim Bento

This project was completed individually.

My contributions included:

- adapting the preprocessing workflow from the midterm project
- implementing the new 70% training, 15% validation, and 15% testing split
- building and applying the preprocessing pipeline
- training and evaluating the required classification models
- implementing the Voting Ensemble and Bayesian Ensemble models
- comparing model performance using Accuracy, Precision, Recall, F1 Score, and ROC-AUC
- generating the final comparison table and analysis
- writing the final report and preparing project deliverables

All code implementation, analysis, and documentation were completed by me.
